31 January 2021

Message from the Guest Editors

Dear Colleagues,

The Green Deal and the sustainability perspectives through which we look at cities and territories today highlight the complexity of the challenges that urban planning is facing. Environmental challenges require us, on the one hand, to design responses to rapid and sudden events (such as the effects of climate change or pandemic events), increasing the quality of built and open spaces. On the other hand, they invite us to rethink the role of nature in the city through strategies that aim to increase urban resilience, improve the health of its inhabitants, guarantee food production, etc. In the face of these conditions, we solicit contributions on the following issues:

- How can a resilient transformation of open and public urban spaces be guaranteed by welcoming, at different scales, different forms of nature within them?
- How can safer and more accessible spaces be designed through experimental design techniques and methods, such as Nature-Based Solutions (NBSs)?
- How can 'bottom-up processes and practices' innovate urban planning regulatory tools and design .

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed by the [Science Citation Index Expanded](#) and [Social Sciences Citation Index](#) (Web of Science), as well as [Scopus](#) and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 14.5 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2020).
